HONOR & AWARDS

Developer of the year 2022 -Xaas Technologies | Vintage Warrior year 2024- I3infosoft

PROJECTS

Wedding Planning - Wedding Affair (Offsite)

Our **Online Wedding Planning** tool is a simple PHP, JavaScript, and CSS project. This platform acts as a link between different restaurants and prospective patrons. Because the project is structured with both admin and user functions, it is possible to handle site content, food item modifications, restaurant additions, and order status checks from the admin side with ease. Interestingly, more than one manager is able to supervise activities on the website.

- **User-Friendly Interface:** Users may easily navigate and access services with our platform's user-friendly interface.
- **Admin Dashboard:** Site content management, food item updates, restaurant additions, and order progress tracking are all made possible by the extensive dashboard that administrators have access to. The effective administration of every operation is ensured by this centralized control.
- **Restaurant Connectivity:** By using our platform, eateries can easily establish connections with prospective patrons, thereby broadening their customer base.
- **Order tracking:** Throughout the wedding planning process, users can easily monitor the status of their orders, giving them transparency and peace of mind.
- **Support for several Managers:** Our platform's capacity to support several managers guarantees flexibility in assigning administrative duties and upholding effective site administration.

[4Acheiversonline.com - CRM](#)

- CRM that satisfies their unique operational requirements. Any B2B company must have a strong sales force, excellent customer service, carefully thought-out marketing campaigns, and a system in place to track total productivity.
- In order to facilitate easier access to the student curriculum, the trainer trained student counseling with student management and the student for the LMS.
- The administrator can oversee all aspects, including batch creation, student addition and modification, trainer tracking for each student, and student assessment of trainer input.
- Counseling can also track which students were added, in which batch, and what the students' opinions are of the trainer.
- Chat and student support for any assistance with the graduate training syllabus with trainer

[Jobhubster.in job-portal](#)

- The job portal Jobhubster allows job seekers to easily register, log in, and create a profile.
- Applying for jobs and monitoring recruiters' comments is made simple for job seekers who search for positions by firm, title, and other criteria.
- Employer recruiters can easily log in, register using an auth key for the first time, and search job seekers' profiles and resumes as needed.
- A recruiter can also make an automatically shown new job post and beauty JD.
- In features such as automatically recommendations from job seekers

Developed 100+ websites at i3infosoft Pvt Ltd, collaborating closely with clients to deliver visually appealing and user-friendly solutions, enhancing the company's reputation for excellence in web development.
